

# Bioweed™ Herbicide

For indoor weed control.

## Long term weed control solution in glasshouses and poly tunnels

**BIOWEED™ IS A SAFE AND EFFECTIVE ALTERNATIVE TO HAND WEEDING AROUND FLOWERS, VEGETABLES AND OTHER GLASSHOUSE OR POLY TUNNEL CROPS.**

- NO withholding period
- Reduces long term weed pressure by eradicating weed seeds;
  - on the plant
  - on the soil surface
  - within the soil horizon
- Maintains your soil health. Zero residue, does NOT harm soil biology
- Non-systemic
- Non-hormonal
- Contact only herbicide (does not translocate)
- Improved crop, operator and environmental safety
- Organically certified with NASAA and BFA

“This product is much cheaper and a lot faster than hand weeding.”

Jason Dekker - Owner/Manager, Dekkers' Flowers

## HOW TO USE BIOWEED™ IN GLASSHOUSES AND POLY TUNNELS

**Safe to use around the base of established crops.**

Offers a faster, cheaper and longer term weed control solution than hand weeding.

**12 hours after application of BioWeed™ Herbicide**

Weeds fall over and die rapidly. Full browning-off of the weeds will be achieved after 3-5 days.

## Safe and effective indoor weed control

### FREQUENTLY ASKED QUESTIONS...

#### How does BioWeed™ work?

BioWeed™ is a contact only herbicide. It works by stripping the outer lipid coating off the surface of the weed leaf and seed.

Without this coating the weed can't control its water loss and therefore dies.

#### Will BioWeed™ harm or kill my crop?

No. BioWeed™ is safe to spray on to and up to the stem of established crops such as tomatoes, cucumbers and roses. Why?

- BioWeed™ CAN NOT translocate through your crop plants. Minor overspray will not kill your crop.
- BioWeed™ will not harm the stronger lignin coating on the stem of your crop plants.

#### How do I safely apply BioWeed™ around my crop?

Spray AROUND the base of each plant targeting the weeds. Use the correct application rate and recommended nozzle. DO NOT spray directly over the top of your crop.

#### Will BioWeed™ build up in the soil, leaving a residue?

No. BioWeed™ has zero soil residue and dissolves into a naturally occurring oxide in 72 hours.

#### Is there a withholding period?

No. There is no withholding period from application to harvest.

### APPLICATION RATES

Tank size (total spray mix)	BioWeed™ 10%		BioWeed™ 15%		BioSoft™ 5% (added to total spray mix)
	Water	BioWeed™	Water	BioWeed™	
1 Ltr	0.90 Ltr	0.10 Ltr	0.85 Ltr	0.15 Ltr	0.05 Ltr
5 Ltrs	4.50 Ltrs	0.50 Ltr	4.25 Ltrs	0.75 Ltr	0.25 Ltr
10 Ltrs	9.00 Ltrs	1.00 Ltr	8.50 Ltrs	1.50 Ltrs	0.50 Ltrs

The product label should be consulted before use of any products referred to in this publication.

Correct spraying technique for younger plants.

Use a TG2 brass nozzle.

If you do not have interchangeable nozzles then adjust the spray wand to give a medium coarse size droplet.

Pump continuously as you spray out the mix, to ensure an even, strong pressure.

This will improve coverage.
